

Two of the leading audiovisual manufactures have come together to create a truly integrated and streamlined solution for your business. Microsoft® and Crestron® have collaborated to bring more unified communication and simple user experience than ever before, with Microsoft Teams™ and Crestron Flex®.

Here at Asnet, we have combined the best in technology into a simple, all-encompassing bundle to specifically suit your small meeting space.

MICROSOFT TEAMS™

Microsoft Teams™ software is the hub for teamwork in Office 365® software. This complete meeting experience brings high definition video, audio and content sharing, and integrates all the people, content, and tools your team needs to be more engaged and effective.

CRESTRON FLEX™

Crestron Flex™ has developed a solution to instantly and securely connect and collaborate with your team, associates or customers. Simply call, present and videoconference using Microsoft Teams™ by plugging in your laptop, or connecting wirelessly from your laptop or smart device.

KEY FEATURES:

- Crestron Flex™ natively runs Microsoft Teams™ or Skype for Business™
- Instantly present, call, and display in-room content or remotely
- Easily connect with one-touch join
- Securely connects to the network
- On-screen room availability and meeting details
- Exceptional microphone and speaker quality

REQUIREMENTS:

- Assumes customer supplied cloud Microsoft Teams® or Skype for Business® 365 licence. (Ask us about hybrid or on-premises options)
- Assumes suitable room size, flat wall, power and data outlets
